As the Soviets drew closer to Berlin, Gehlen dispersed his staff and transferred the FHO’s intelligence files to secret locations in Bavaria. There, Gehlen and his handpicked officers waited to surrender to American forces. Gehlen believed that the Western Allies and the Soviet Union, while wartime partners, would soon become peacetime rivals. With his knowledge about the Russians, combined with the FHO’s collective resources, Gehlen felt he could influence relations between the East and West and help shape Germany’s role in postwar Europe.

Born in 1902, Gehlen entered the Reichswehr, the Weimar Republic’s small army, shortly after the end of the World War I. He advanced through the officer ranks and joined the General Staff as a captain in 1936. During the invasion of Poland three years later, he served as a staff officer in an infantry division where his organizational planning and staff work attracted the attention of senior officers. By mid-1942, Gehlen took charge of the German Army High Command’s Fremde Heer Ost (FHO or Foreign Armies East), with the responsibility of preparing intelligence on the Soviet Union. Gehlen’s work in this position eventually incurred the wrath of Hitler, who rejected Gehlen’s pessimistic reports about the strength and capabilities of the Soviet Army. Hitler summarily dismissed Gehlen, now Generalmajor, in April 1945.

Gehlen did not leave Berlin empty-handed. He knew that the FHO had some of the most important files in the Third Reich and that the possession of these records offered the best means of survival in the post-Hitler period. As the Soviets drew closer to Berlin, Gehlen dispersed his staff and transferred the FHO’s intelligence files to secret locations in Bavaria. There, Gehlen and his handpicked officers waited to surrender to American forces. Gehlen believed that the Western Allies and the Soviet Union, while wartime partners, would soon become peacetime rivals. With his knowledge about the Russians, combined with the FHO’s collective resources, Gehlen felt he could influence relations between the East and West and help shape Germany’s role in postwar Europe.
The US Army Picks Up Gehlen

Even before Nazi Germany's capitulation, Allied forces were on the lookout for German officers and enlisted personnel with intelligence backgrounds. Indeed, as the Americans looked for Gehlen, he tried to surrender to an American unit. After a circuitous route, the US Army finally delivered Gehlen and his men to the 12th Army Group Interrogation Center near Wiesbaden in June 1945. Interned at the "Generals' House," Gehlen reassembled his staff and files under the overall direction of Army Capt. John R. Boker, Jr. (U)

Boker, who had previously interrogated other German officers, expressed his feelings as he started his interrogation of General Gehlen. "It was also clear to me by April 1945 that the military and political situation would not only give the Russians control over all of Eastern Europe and the Balkans but that, as a result of that situation, we would have an indefinite period of military occupation and a frontier contiguous with them." Boker quickly became the 12th Army Group's resident expert on the Soviet Army because of his interrogation of German officers who had fought on the Eastern Front.

Gathering Gehlen's staff and records required some subterfuge on Boker's part. He was aware, from previous experience, that "there existed in many American quarters a terrible opposition to gathering any information concerning our Soviet Allies." He did, however, gain the support of Col. Russell Philp, commander of the Interrogation Center, and Brig. Gen. Edwin L. Sibert, G-2 for the 12th Army Group, to employ the former FHO staff members to produce reports on the Soviets. Gehlen also wanted Boker to establish contact with some of his frontline organizational elements, such as Oberstleutnants Herman Baun, who commanded Stab Walli I, which conducted espionage work against the Soviets using Russian defectors and provided raw intelligence to Gehlen's FHO. Gehlen insisted that he had access to still-existent agent networks in the Soviet Union through Baun's sources.

Army headquarters in Washington learned about Gehlen's activities at Wiesbaden and, after some debate, Boker received orders to bring the German group to the United States. Army G-2's primary interest, however, centered on the retrieval and analysis of the FHO records, not in its personnel. Boker, who had become quite attached to his project, resented losing control of Gehlen and his staff section after their secret departure for Washington on 21 August 1945. Placed as virtual prisoners in a classified building at Fort Hunt, Virginia, (known simply as P.O. Box 1142), the Army planned to use Gehlen in conjunction with a larger project being conducted at Camp Ritchie, Maryland, to compile
Maj. Gen. Edwin L. Sibert (U)

a history of the German Army on the Eastern Front. (S)

Through Boker's efforts (he accompanied Gehlen's group to the United States) and those of officials with the East European Order of Battle Branch at the Pentagon, the situation for the Germans gradually improved. The BOLERO Group, as Gehlen's unit became known, served under the direction of Army Capt. Eric Waldman until its return to Germany in June 1946. By this point, Gehlen's men not only prepared reports based on German records but also had access to and commented on American intelligence reports. (S)

SSU Rejects Gehlen

While the Army exploited Gehlen and his officers in Washington, US intelligence also sought to question German scientists and engineers about Nazi rocket and atomic developments. The OSS, however, played little role in these activities. In the throes of disbandment during the fall of 1945, OSS declined the Army's invitation to employ Baun in Germany. The new Strategic Services Unit (SSU) also expressed some reluctance about using the German FHO for American intelligence purposes. (S) SSU, however, did try to determine the exact nature of the relationship between Gehlen and Army intelligence. On 25 October 1945, Crosby Lewis, SSU's new chief of mission in Germany, asked Winston N. Scott in London for "Special Sources" information from counterintelligence files pertaining to Stab Walli and various German personalities, including Baun and Gehlen. Writing hastily, Lewis informed London:

For your information only, Baun and a group of other members of Fremde Heere Ost, experts in the G.I.S. on espionage against the Russians, are being collected by two officers of the G-2 section, USEFT, who are responsible only to Gen. Sibert. It appears likely that Sibert got an OK from Washington on this when he was in the U.S. last month, at which time it appeared that OSS might fold up. Von Gehlen and several high-ranking staff officers who operated for Fremde Heere Ost and for some of the Army Group staff on the Eastern Front during the war have been flown to the U.S.—all this without any contact with the OSS here. (S)

In early January 1946, SSU in Germany reported to Headquarters what it had learned "through discreet inquiries" about the Army's activities. SSU described the flight of Gehlen and his FHO staff from Berlin and their activities with the Americans. The report also stated that Gehlen had recommended that Herman Baun be contacted to provide further information about the Soviets while the general worked in the United States. Baun, in fact, had been arrested by the US Army as a "mandatory arrestee" (members of Nazi party organizations and high-ranking German Army and SS officers were subject to immediate apprehension by the Allies) in late July 1945 and interrogated at the 3rd Army Interrogation Center the following month. The announcement of his arrest and the distribution of a Preliminary Interrogation Report created great concern at Army G-2 because the Soviets now demanded the extradition of both Baun and Gehlen. (C)

The Army refused to accede to the Soviet demand and secluded Baun and several other FHO personnel at the Military Intelligence Service Center (MISC) at Oberursel on the outskirts of Frankfurt (also known as Camp King and later officially designated as the 7700th European Command Interrogation Center). The small group, including Gerhard Wessel, who had succeeded Gehlen as the head of FHO in 1945, was quartered at the "Blue House," where Baun planned to develop a full-scale intelligence organization. According to SSU, G-2 wanted to use Baun to resurrect his Abwehr network against the Soviets. This proved difficult and SSU reported that it "advised them [the US Army] to interrogate Baun at length and have nothing to do with his schemes for further intelligence activity." (S)

In November 1945, in fact, Lewis responded to a request by General Sibert that SSU take over Baun's
operation from the Army. After reviewing Baun’s plans, Lewis rejected them outright, calling them “rather grandiose and vague suggestions for the formation of either a European or worldwide intelligence service to be set up on the basis of wartime connections of Oberst Baun and his colleagues, the ultimate target of which was to be the Soviet Union.” Lewis found a number of shortcomings with the employment of Baun, including cost, control, and overall poor security measures. The fact that the Russians wanted to question Baun and Gehlen, as well as other German intelligence figures, also did not sit well with Lewis.11 (S)

Meanwhile, Boleslav A. Holtsman, a SSU/X-2 counterintelligence officer in Munich, had interrogated another officer of Stab Walli, Oberst Heinz Schmalschlag, about German intelligence activities against the Russians. In fact, SSU felt that Schmalschlag was a better source of information on German intelligence activities on the Eastern Front than Baun, a Russian-born German.12 Despite SSU’s advice that the Army dismiss Baun and reduce its reliance on FHO-derived intelligence, the opposite took place. Baun thrived under US Army auspices and he established a service to monitor Soviet radio transmissions in the Russian zone in January 1946. Two months later, Baun received further authorization from the Army to conduct both positive and counterintelligence activities in Germany.13 (S)

Operation RUSTY

In July of that year, the Army returned General Gehlen and the remaining FHO members to Germany. At this point, Lt. Col. John R. Deane, Jr., Operations Officer at MISC, published his plans to merge Gehlen’s BOLERO group with Baun’s already-existent staff, known as KEYSTONE, at Oberursel. General Gehlen would coordinate the functions of both elements of the German organization while he had direct responsibility for the Intelligence Group. This element evaluated economic, military, and political reports obtained by agents of Baun’s Information Group.14 The Army designated the entire organization as Operation RUSTY, under the overall supervision of Col. Russell Philp, Lt. Col. John R. Deane, Jr., and Capt. Eric Waldman, who had preceded Gehlen’s return to Germany from Washington.15 (S)

Gehlen’s reports, Deane expected, “will be of great value to the G-2 Division in that they will furnish the closest thing to finished intelligence that can be obtained from sources other than U.S.”16 Deane’s optimistic outlook indeed spurred the Army to submit even greater number of requests to Operation RUSTY. Baun quickly expanded his collection efforts to meet the Army’s insatiable appetite for information on the new Soviet threat in Europe. By October 1946, Gehlen and Baun claimed to have some 600 agents operating throughout the Soviet zone of Germany who provided the bulk of intelligence on the Russian order of battle.17 (S)

As the Army’s demands grew, Operation RUSTY transformed from a select cadre of German General Staff officers to large group that suffered from poor cohesion and mixed allegiances. In addition to covering the Soviet zone, Operation RUSTY took on new missions in Austria and other areas of Europe as well as broadened wartime contacts with anti-Communist émigré groups in Germany and with members of the Russian Vlasov Army. The few American officers assigned to the Blue House barely knew the identities of RUSTY agents, thus making it difficult to confirm the validity of German reporting. Baun’s recruiting and training of his agents proved haphazard while their motivation also raised questions because of their black market activities. Throughout the Western Allied zones of Germany, men and women openly claimed to be working for American intelligence, leading to many security breaches which undermined RUSTY’s overall effectiveness.18 (S)

Lacking internal control and American oversight, Operation RUSTY turned out to be an expensive project. By mid-1946, the Army found itself running out of funds and it once again tried to persuade SSU to take over the operation following Gehlen’s return to Germany. On a tour of SSU installations in Germany, Col. William W. Quinn, SSU’s director in Washington, DC, conferred with General Sibert and Crosby Lewis about the Army’s proposal. Once again, Lewis repeated many of his objections that he had made earlier in the fall of 1945 and he suggested that SSU make a “thorough study” before any decision by
Headquarters. In early September, Lewis specified in writing to General Sibert the conditions in which SSU would be prepared to assume responsibility for Operation KEYSTONE. Lewis emphasized the need for US intelligence to have complete access to all German records and identities of leading personalities and agents for initial vetting. (U)

Neither Crosby Lewis, SSU’s chief of mission in Germany, nor any other American official expressed any doubt about employing America’s former enemies as sources of information. The Americans, for example, had embarked upon a large-scale project using German officers to write about their wartime experiences. The Army’s German Military History Program, for example, continued until the mid-1950s and influenced US Army doctrinal and historical writing. The debate about Gehlen’s project, as it became shaped since 1945, revolved around more practical matters, such as cost and security. Crosby Lewis summarized his thoughts about RUSTY for Col. Donald H. Galloway, Assistant Director of Special Operations; in September 1946:

> It is my opinion that SSU AMZON should be given complete control of the operation and that all current activities of this group be immediately stopped before further security breaches nullify the future usefulness of any of the members of the group. I further recommend that an exhaustive study be made along CE lines of the entire operation, past and present, so that at least, if it appears that the group is too insecure to continue an operation, the wealth of intelligence which is contained in the minds of the various participants as regards Russia, Russian intelligence techniques, and methods of operation against the Russians, could be extracted. In conclusion, however, it is most essential that if a final decision is made to exploit these individuals either singly or as a group, SSU understands that their employment in the past and their exploitation in the future constitutes to a greater or less degree the setting up of an incipient German intelligence service. (S)

On the conclusion of General Sibert’s tour as G-2 in Europe, the debate about whether a civilian intelligence agency should be responsible for Operation RUSTY shifted from Germany to Washington. Maj. Gen. Withers A. Burrell, Sibert’s successor as the Army’s chief intelligence officer in Germany, appealed to Lt. Gen. Hoyt S. Vandenberg, formerly Army Chief of Staff for Intelligence and now Director of Central Intelligence, that the newly formed Central Intelligence Group (CIG) assume control of RUSTY. His memorandum, supported by extensive documentation, noted that the Army’s headquarters in Germany considered RUSTY to be “one of its most prolific and dependable sources.” (C)

General Vandenberg, in turn, directed that the CIG take a fresh look at RUSTY. On 16 October 1946, CIG presented its summary of the Burrell material and dismissed Gehlen’s Intelligence, or Evaluation, Group as “drawing broad conclusions from inadequate evidence and a strong tendency to editorialize.”

Regarding Baun’s Information Group, CIG determined that “there is no evidence whatsoever which indicates high-level penetration into any political or economic body in the Russian-occupied zone.” The review also blasted Operation RUSTY for its yearly budget of $2.5 million while CIG’s German Mission cost only $120,000. CIG decidedly rejected assumption of RUSTY, although it did call for a full study in order to identify salvageable aspects of the operation. The report made two significant comments that reflected CIG’s overall frame of mind:

1. It is considered highly undesirable that any large scale US-sponsored intelligence unit be permitted to operate under even semi-autonomous conditions. Unless responsible US personnel are fully acquainted not only with the details of each operation carried out but also with the
identities and background of all individuals concerned, no high degree of reliability can be placed from an American point of view upon the intelligence produced.

2. One of the greatest assets available to US intelligence has always been the extent to which the United States as a nation is trusted and looked up to by democratic-minded people throughout the world. Experience has proven that the best motivation for intelligence work is ideology followed by common interests and favors. The Germans, the Russians, their satellites, and, to a lesser extent, the British, have employed fear, direct pressure of other types, and, lastly, money. With most of these factors lacking to it, Operation RUSTY would appear to depend largely on the last and least desirable. 25 (C)

The Bossard Report

In a letter to General Vandenberg in October 1946, Colonel Galloway reiterated CIG's concerns about RUSTY's costs and questions about its security. He recommended that CIG not take over the operation. 26 The Army and CIG, however, agreed in the fall of 1946 that the CIG could conduct its own examination of RUSTY. As a result of discussions held in New York City in December, Samuel B. Bossard arrived at Oberursel in March 1947 to evaluate the German operation and its future potential. 27 Unlike Crosby Lewis, Bossard had a different, and favorable, impression of Operation RUSTY during the course of his two-month study. "The whole pattern of operation," Bossard proclaimed in the first paragraph of his report, "is accordingly positive and bold; the factors of control and risk have become secondary considerations and thus yield to the necessity of obtaining information with speed and in quantity." 28 (S)

In a stunning reversal of earlier criticism of RUSTY, Bossard compared the operation to the wartime work of OSS with various Resistance groups where results mattered more than control. He dismissed "the long bill of complaints prepared by our own counterintelligence agencies against the lack of security in this organization." Bossard declared, "in the end [this] serves more as a testimony to the alertness of our counter-intelligence agencies and a criticism of our own higher authorities for not effecting a coordination of interests than a criticism of the present organization and its operating personnel." 29 (S)

Bossard's report marked the first time that either SSU or CIG had the opportunity to examine on its own the operation and to question both Gehlen and Baun as well as other members of the German operation. Impressed with the anti-Communist sympathies of the Germans and the breadth of their contacts (especially with various émigré groups), Bossard found "no evidence to prove that the unusual confidence that had been placed by American authorities in the German operators had been abused." Bossard made eight recommendations to the DCI, with the bottom line being that the CIG should take responsibility for RUSTY. 30 (S)

Bossard believed that Operation RUSTY had proven to be a useful anti-Communist intelligence organization. If the United States abandoned RUSTY, it would still have the same intelligence requirements as before, although with fewer resources. Likewise, American control of the German operation could only strengthen the overall project and reduce its security risks. Bossard felt that Operation RUSTY offered the Americans a ready-made, knowledgeable German intelligence service that formed a "strong core of resistance to Russian aggression." 31 (S)

Bossard's findings unleashed a flurry of activity in Washington during the summer and fall of 1947. On 3 June, Colonel Galloway recommended to R. Adm. Roscoe H. Hillenkoetter, who had just taken over as DCI from General Vandenberg, that he approve the Bossard Report. Galloway added that CIG's takeover of RUSTY should be cleared through the G-2 in Germany and brought to the attention of the National Intelligence Authority, predecessor to the
National Security Council. Colonel Galloway remained concerned that support of the German intelligence service could conflict with both State Department policies in dealing with a "potential resistance group" as well as interfere with the signals intelligence work of the US Army and Navy. 32 (S)

A few days later, Admiral Hillenkoetter prepared a memorandum for the Secretaries of State, War, Navy, as well as President Truman's personal representative to the National Intelligence Authority on Operation RUSTY. It outlined the organization's history and CIG's earlier examination into the question of assuming responsibility. In his cover memorandum, Admiral Hillenkoetter expressed the "strong" recommendation that "Operation RUSTY be liquidated and that CIG assume no responsibility for its continuation or liquidation." 33

Hillenkoetter felt that the CIG should have no connection with RUSTY without the knowledge and approval of the National Intelligence Authority. (S)

Hillenkoetter's recommendation raised a furor in Army circles, and he held a high-level conference on 19 June 1947 to discuss Army-CIG relations and Operation RUSTY. Having been shown the proposed NIA memorandum outlining Hillenkoetter's rejection of RUSTY, Maj. Gen. Stephen J. Chamberlin, the Army's Director of Intelligence, asked that the document be withdrawn in its entirety. He stated that he did not plan to discuss the matter even with the Secretary of War. Consequently, the Army momentarily relented in its efforts to have CIG assume responsibility for RUSTY. Hillenkoetter warned Chamberlin about the national security risks posed by the US support of a resurgent German General Staff and intelligence service. General Chamberlin agreed that this perception created problems and promised to have Maj. Gen. Robert L. Walsh, the Army's G-2 in Germany, oversee tighter control over the operation. 34 (S)

While the CIG and the Army debated the merits of Operation RUSTY in Washington, Lt. Col. Deane at Oberursel oversaw the almost-daily growth of Gehlen's intelligence service. The rapid expansion of agents and reports in 1946 presented a challenge in terms of control and quality. General Gehlen, upon his return that summer, discovered that Baun had his own plans for a German intelligence service which did not meet with Gehlen's approval. Baun's ambitious grasp for control of the organization, coupled with mounting questions about his agents and finances, resulted in his gradual removal by the Americans and Gehlen during the course of 1947. 35

The Army, in the meantime, did take some steps to improve its control over RUSTY, including the formation of a military cover organization, the 7821st Composite Group. 36 Immediately before RUSTY's transfer from Oberursel to its own compound in Pullach, a small village near Munich, in the late fall of 1947, Lt. Col. Willard K. Liebel replaced Deane as Operations Officer. 37 (S)

CIA's Misgivings

There was still little enthusiasm for RUSTY after the establishment of the CIA in the fall of 1947. Henry Hecksher, who had served as chief of the German Mission's Security Control (or counterintelligence) branch in 1946-47, provided an update to Richard Helms, chief of Foreign Branch M (which handled CIA's operations in Central Europe), in mid-March 1948 about the German intelligence organization's activities. Hecksher observed that while RUSTY "enjoys the unqualified backing of the Army in Germany," he felt that the Soviets must have penetrated the German group. "The political implications alone (leaving aside the espionage angle) would come in handy if the Russians at any time should look for a pretext to provoke a showdown in Western Germany," Hecksher declared. Likewise, he was concerned about "the political implications of sponsoring an organization which in the opinion of qualified observers constitutes a reactivation of the German Abwehr under American aegis." 38 (S)
With great disgust, Gehlen, acting chief of CIA's Karlsruhe operations base, related his experiences with RUSTY in an August 1948 memorandum to Headquarters. Gehlen first encountered Baun's operatives in the summer of 1946 when the Army's Counterintelligence Corps (CIC) arrested a number of Germans who claimed to work for American intelligence. CIC informed Gehlen about these arrests, and he launched an investigation as to the background of the German agents. He found that "some of the agents employed were SS personnel with known Nazi records and, in most cases, undesirable people. Recruiting methods then employed," he complained, "were so loose that former German officers and noncoms were blindly approached to work for American intelligence in espionage activity directed against the USSR." 39

RUSTY's approach went against all principles of intelligence work. "In the recruitment methods no attention was paid to the character of the recruits, security, political leanings or quality, with the result that many of the agents were blown almost immediately," Gehlen felt that RUSTY's "recruiting methods indicated a highly nationalistic group of Germans who could easily become the nucleus of serious subversive activity against any occupying power. At the same time, Gehlen commented, "the distribution of operational supplies, money, etc. was so loose and elaborate that the influence on the black market certainly was considerable." 40

Gehlen expressed his displeasure with RUSTY and protested any plans for future association between this group and CIA. In a lengthy summary, Gehlen presented the viewpoint of many CIA officers:

The general consensus is that RUSTY represents a tightly knit organization of former German officers, a good number of which formerly belonged to the German general staff. Since they have an effective means of control over their people through extensive funds, facilities, operational supplies, etc., they are in a position to provide safe haven for a good many undesirable elements from the standpoint of a future democratic Germany. Most of these officers are unable to find employment, and they are therefore able to maintain their former standard of living without having to put up with the present difficulties of life in conquered Germany. They are likewise able to maintain their social standing as former officers and to continue their own study in the military field and continue training along military lines. The control of an extensive intelligence net makes it possible for the leaders to create a cadre of officers for the perpetuation of German general staff activity. The organization of RUSTY makes it possible for them to continue a closely knit organization which can be expanded as will.

Gehlen, formerly SSU's X-2 chief in Germany and now head of CIA's Munich operations base, reported his views of RUSTY in a July 1948 memorandum to Gordon M. Stewart, CIA's chief of mission in Germany. Like his colleagues, Gehlen protested...
RUSTY's poor security practices and its "freewheeling" methods of agent recruitment expressed particular distaste at RUSTY's abuse of the denazification laws which undermined the operation's overall standing. A quoted a "local cynic" who said that "American intelligence is a rich blind man using the Abwehr as a seeing-eye dog. The only trouble is—the leash is much too long."42 (S)

As late as mid-1948, Admiral Hillenkoetter resisted the Army's overtures to assume control of RUSTY. In July 1948, the DCI informed the Army's Director of Intelligence that he did not want the Army to use a 1946 letter of agreement between the War Department and CIG to obtain services, supplies, and equipment for the 7821st Composite Group, the Army's cover organization for RUSTY. Hillenkoetter believed that a new, and separate, agreement should be drawn up between both organizations to support the Army's requirements for RUSTY.45 (S)

At the same time, Hillenkoetter provided General Chamberlin with some news about RUSTY that he had learned from various sources. In one case, Samuel Bossard, now in England, had received a letter from a mysterious "R. Gunner" about "some dangerous points." Gunner, believed to be General Gehlen, asked for Bossard's "personal advice concerning certain business questions" and wanted him to come to Munich.46 Disagreements between Gehlen and his American military counterpart, Lieutenant Colonel Liebel, now made their way to the highest levels of CIA. The entire project appeared on the verge of disintegration.47 (S)

The Critchfield Report

Matters soon came to head which forced the CIA to act whether it should maintain a German intelligence organization. While the Army issued RUSTY with priorities in terms of targets and regions, Major General Walsh, the Army's chief intelligence officer in Germany, informed Admiral Hillenkoetter in October 1948 that the Army could no longer fund RUSTY for any activities other than order of battle intelligence.48 During a visit to Germany, the DCI discussed the matter with Walsh and agreed to provide limited funds while CIA conducted yet another investigation of the Army's German operation. Immediately before Admiral Hillenkoetter's agreement with the Army, Colonel Galloway and Gordon Stewart conferred about RUSTY. They concluded that the Agency needed to begin penetration efforts against RUSTY, "or at least [be] carefully watched and reported upon, and that we should pay particular attention to its attempts to become the official German intelligence service."49 (S)

The die was now cast, leading CIA down a long path that has now indelibly linked the Agency with General
Gehlen and his intelligence service. On 27 October 1948, Colonel Gallo-
way told Stewart that he wanted James H. Critchfield, the newly
arrived chief of Munich operations base, to examine RUSTY and pre-
pare a report similar to that done by
liocsarAi-in1947. Critchfield's man-
date - s-crecite -d—th; he Should evaluate
RUSTY's OB facilities and deter-
mine which elements should either
be	 j, by CIA, exploited, left
with the Army, or liquidated. The
report, Galloway noted, should be
thorough but also completed within
a monch. 50

Critchfield, a young US Army com-
batt veteran, had served in military
intelligence staff positions in both
Germany and Austria when he
joined the new CIA in 1948. He
embarked on his new project with
vigor and met his deadline when he
cabled a summary of his findings to
Washington on 17 December.51 His
full report, with annexes, arrived at
Headquarters after that point. An
extensive study, Critchfield and
several associates examined the
Army's relationship with RUSTY, its
funding, organizational structure,
intelligence reporting, overall opera-
tions and procedures, and Gehlen's
own future projections for his group.
Critchfield's report stands as the
CIA's (and its predecessors) most
thorough review of the growing Ger-
man intelligence service. 52

Critchfield's report also set the tenor
for future CIA relations with
Gehlen. While he made several
important points, Critchfield
observed that CIA could not ignore
the presence of RUSTY. He wrote:

In the final analysis, RUSTY is
a re-established GIS which has
been sponsored by the present de
facto national government of
Germany, i.e. by the military
occupational forces. Because the
4,000 or more Germans who
comprise RUSTY constitute a
going concern in the intelligence
field, it appears highly probable
that RUSTY will emerge as a
strong influence, if not the domi-
nant one, in the new GIS.

Another important consideration
is that RUSTY has closest ties
with ex-German General Staff
officers throughout Germany. If,
in the future, Germany is to play
any role in a Western European
military alliance, this is an
important factor. 53

As Critchfield pointed out, RUSTY
was a fait accompli, regardless of
whether CIA wanted the German
organization or not. He advocated
the Agency's assumption of RUSTY
because "from an intelligence view-
point, it seems desirable that CIA
enter RUSTY at that point where it
can control all contacts and opera-
tional developments outside of
German territory."54 Admiral
Hillenkoetter, however, reluctantly
agreed to this move and made it clear
that "CIA was not asking to take
over Rusty and was expressing a will-
ingness to do so only because the
Army was requesting it."55

Gen. Omar Bradley, the Army's
Chief of Staff (and soon-to-be Chair-
man of the Joint Chiefs of Staff) and
Secretary of Defense James V. Forr-
estal both supported the Agency's
move, as did individual members of
the National Security Council.
Throughout the first months of
1949, the Agency, the Department
of the Army, and Gen. Lucius D.
Clay, US military governor of Ger-
many, debated the issue of the CIA's
assumption of RUSTY. 56 Likewise,
Critchfield in Pullach had his hands
full with an ongoing dispute between
Gehlen and Colonel Philp, the new
US Army commander on the
scene.57 With General Clay's depar-
ture from Germany in May, the
Agency assumed control on 1 July
1949.58

CIA's Trusteeship

Even before the official transfer in
mid-1949, Critchfield specified the
terms of agreement between the CIA
and the German organization. The
basic agreement reached by Critch-
field and Gehlen in June 1949
recognized that "the basis for US-
German cooperation in this project
lies in the mutual conviction of the
respective parties that increasing
cooperation between a free and dem-
ocratic Germany and the United
States within the framework of the Western European Union and the Atlantic Community is indispensable for the successful execution of a policy of opposition and containment of Communist Russia. 59 (S)

Critchfield acknowledged that "the members of the German staff of this project are acting first and foremost as German nationals working in the interest of the German people in combating Communism." Yet, the Agency's chief of base insisted that until Germany regained its sovereignty and the two countries made new arrangements, the CIA would remain the dominant partner and call the shots. Critchfield, for example, would specify US requests to Gehlen for intelligence priorities and that "complete details of operational activities will be available to US staff." While US officials would deal with the Germans in "an advisory and liaison capacity," Critchfield planned to closely examine the Gehlen Organization. "All operations outside of Germany will," Critchfield noted, "be reduced to a project basis with funds provided for each project as approved and on the basis of continuing review of operational details and production." 60 (S)

Relations between the Agency and German intelligence service (known variously as ODEUM and ZIPPER) during the first half of the 1950s were often at odds. 61 Gehlen resented the American intrusion, which was far more sweeping than the Army's. In 1950, for example, Critchfield reduced the number of Gehlen's projects from 150 to 49, and he soon whittled this latter number to 10. CIA cut the vast bulk of German projects for nonproduction of any worthwhile intelligence or even possessing any potential value. Critchfield bluntly told Gehlen in 1950 that "it was high time he recognized the fact that his organization, while viewed in a most creditable light for its tactical collection and especially its military evaluation work, was considered definitely second class in any intelligence activity of a more difficult or sophisticated nature, and that if he had any aspirations beyond that of producing a good G-2 concern for the future German Army, some drastic changes were in order." 62 (S)

While the CIA and its predecessors had long protested against the use of the German intelligence service, the American service soon found itself defending its own ties to the Gehlen Organization. As early as 1953, the two agencies had become so entwined that even Roger M. Keyes, Deputy Secretary of Defense, criticized the Agency's role in Germany. Frank Wisner, the Deputy Director for Plans, responded that "there is no adequate answer or correction of the assumption that we rely very largely upon the ZIPPER effort for intelligence on Eastern Europe generally." Wisner stated, "this is a common fallacy which is always cropping up and it should be pointed out that we have our own independent operations in addition to the Zipper effort." 63 The Agency also found that supporting the German service to be an expensive proposition with little actual control over its personnel. 64 (S)

Cutting Both Ways

CIA's support of the Gehlen Organization proved a double-edged sword. On the one hand, US assistance to the nascent West German intelligence service strengthened ties between the two countries. The United States and the Federal Republic of Germany remained close allies throughout the long years of the Cold War. On the other hand, CIA's relationship with the Gehlen Organization also had lasting impact in terms of counterintelligence and Warsaw Pact propaganda efforts. (U)

The Gehlen Organization was a chief target because of its links to the Third Reich. 66 (U)

While the Agency's support to the Gehlen Organization remains a controversial topic, it took on this responsibility after lengthy debate and with the full knowledge of the risks. The CIA recognized that its ties to Gehlen meant it inherited many negative aspects that had also plagued the Army between 1945 and 1949. Gehlen's intelligence on the Soviet Union, however, outweighed these problems during the hottest years of the Cold War. The history
of postwar Germany needs to take into account the origins of the CIA's trusteeship of the Gehlen Organization. (U)

NOTES

2. For a radical view regarding the CIA's link with the West German intelligence service, see Carl Oglesby, "Reinhard Gehlen: The Secret Treaty of Fort Hunt," Covert Action Information Bulletin 35 (fall 1990), pp. 8-14. (U)

3. For a review of the organization of German intelligence during the war, including the Fremde Heer Ost, written by German officers, see "Development of the Secret Information Service from the End of World War I until the End of World War II," (undated). See also SAINT, London to SAINT, "The German Intelligence Service and the War," 7 January 1946, XX-10403, enclosing a British report, "The German Intelligence Service and the War," all documents in Directorate of Operations Records, Job C-2, Box 1, Folder 9, CIA ARC (S).

5. A general history of this early period is found in Chief, EE to EE/G, ATTN: "C.-	 , "History of the Gehlen Intelligence Organization," 28 March 1960, enclosing "History of the Gehlen Intelligence Organization," September 1953, DO Records, Job C-2, Box 1, Folder 5, CIA ARC (S) (hereafter cited as "Gehlen History"). See also 1 C-2, C L C-3 Clandestine Services Historical Series C-2 DCI History Staff, 1973, 4 volumes, (hereafter cited as CSHP C-3 (S).

6. Further details about Stab Walli are found in Baun's interrogation in Counterintelligence War Room London, Situation Report No. 154, "Leitstelle - I OST (Walli), 15 January 1946, (S), in Herman Baun, File C-2 DO Records. (S)

8. Crosby Lewis to Winston M. Scott, 25 October 1945 (S), Baun, C-2. See also Scott to Lewis, 30 October 1945, (S), Baun, C-2 (S).

are outlined in Lewis to Colonel Galloway, "KEYSTONE Operation," 22 September 1946, DO Records, Job □, □ Box 2, Folder 8, CIA ARC (S). A copy of this same memorandum with an attachment is also located in DO Records, Job □, □ Box 3, Folder 1, CIA ARC (S).

12. SAINT, AMZON to SAINT, "Russian Experts of German Intelligence Service," 8 January 1946 (S) and untitled note to "Reg Phelps," in Baun, □, □ (S)

14. For a roster of the Intelligence Group (also known as the Evaluation Group) and the Information Group, see "Gehlen History," pp. 21-22. (S)

15. Lt. Col. John R. Deane, Jr., Operations Officer, USFET MISC, to G-2, USFET, "Plan for the Inclusion of the BOLERO Group in Operation RUSTY," 2 July 1946, DO Records, Job □, □ Box 2, Folder 2, CIA ARC (TS). The operation is variously described as gaining its designation from either a nickname given to Lieutenant Colonel Deane's young son or that given to Colonel Russell Philp, commanding officer at "Basket," the secure facility at Bluestein, the Reichard Gehlen, p. 207, and chief of station, Karlsruhe to Chief, FBM, "Bi-Weekly Letter," 4 December 1948, MGM-A-859, DO Records, Job □, □ Box 5, Folder 9, CIA ARC (S) □, □ states emphatically that Operation RUSTY gained its name from the son of Lieutenant Colonel Deane, see CSHP □, □ vol. 1, p. V-1. (S)

16. Deane to G-2, USFET, 2 July 1946; for a copy of one Evaluation Report, see Evaluation Report No. 2, Operation RUSTY, "Political and Military Training of German PWs in USSR for Commitment in Germany," 27 September 1946, DO Records, Job □, □ Box 1, Folder 5, CIA ARC (S). This Evaluation Report was prepared in response to a May 1946 US Army request to investigate and report all measures taken by the Soviets to form a German army. This same folder also contains numerous Intelligence Reports produced by Operation RUSTY in 1946. (S)

18. For a description of many of these problems, see "Gehlen History," pp. 24-29, 34. Examples of SSU and CIG reporting about RUSTY's security problems are numerous and can be seen in □ to Chief, IB, "Agent Net Operating in the Bamberg Vicinity," 17 September 1946; □ to □ "American Intelligence Network," 18 March 1947, enclosing "American Intelligence Network," 25 January 1947; and various intelligence reports about Operation KEYSTONE from CIG's various agents in Munich in 1947. All of these documents are located in DO Records, Job □, □ Box 5, Folder 8, CIA ARC (S).

19. Lewis to Galloway, "KEYSTONE Operation," 22 September 1946, DO Records, Job □, □ Box 36, Folder 8, CIA ARC (S). See also an undated, unclassified summary of Lewis's cables to Washington in 1946 in DO Records, Job □, □ Box 5, Folder 9, CIA ARC (S).

20. The Americans referred to the German intelligence service through a variety of project names, including BOLERO, KEYSTONE, and RUSTY. The use of the term "RUSTY" supplanted KEYSTONE in 1946 until CIA's assumption in 1949. After that point, the operational terms changed once again. (C)

21. Lewis to Sibert, "Operation KEYSTONE," 6 September 1946, DO Records, Job □, □ Box 2, Folder 2, CIA ARC (S). A declassified copy of this same memorandum also appears in Record Group 226, Records of the Office of Strategic Services, Entry 178, Box 4, Folder 39, National Archives and Records Administration. (S)

23. Lewis to Galloway, "KEYSTONE Operation," 22 September 1946, DO Records, Job □, □ Box 36, Folder 8, CIA ARC (S).

24. Copies of W.A. Burress to Hoyt S. Vandenberg, "Operation RUSTY—Use of the Eastern Branch of the Former German Intelligence Service," 1 October 1946, DCI Records Job □, □ Box 13, Folder 13, (C) and DCI Records, Job □, □ Box 11, Folder 481, (S), CIA ARC. A full copy of the Burress memorandum and supporting documents can be found in DO Records, Job □, □ Box 2, Folder 2, CIA ARC (TS). The "Vandenberg Report" is the best summary report about Operation RUSTY during the Army's early period of control. (S)

25. "R.K." to Deputy A, "Operation RUSTY," 16 October 1946, DO Records, Job □, □ Box 5, Folder 2, CIA ARC (C). The identity of the correspondent is uncertain at this time although it may have been Rolfe Kingsley. In November 1946, General Vandenberg asked that the Army send Gehlen and Baun to the United States for conferences with CIG. See DCI, Memorandum for Major General Stephen J. Chamberlin, Director of Intelligence, "Operation RUSTY—Use of the Eastern Branch of the Former German Intelligence Service."
26. Galloway to DCI, "Operation RUSTY," 17 October 1946, DO Records, Job 0001 Box 13, Folder 549, CIA ARC (C). This document appears as an annex to the Bossard Report. (S)

27. The New York meeting on 19 December 1946, organized by General Vandenberg, brought together a number of the top American intelligence figures to discuss RUSTY. Held at the apartment of Allen Dulles, the meeting included Dulles, William H. Jackson (both special advisors to CIG), Brig. Gen. Edwin K. Wright (DDCI), Brigadier General Sibert, Colonel Galloway, Col. Laurin L. Williams of Army G-2, Lieutenant Colonel Deane from RUSTY, Richard Helms, and Samuel Bossard. The group agreed that CIG should hold an investigation of RUSTY "on the ground" because "certain parts had possible long-range values." (SHP vol. 1, pp. V-7 through V-8. See also Richard Helms, Memorandum for the Record, "Operation RUSTY," 19 December 1946, DO Records, Job 0001 Box 13, Folder 9, CIA ARC (TS). Further discussion of the Bossard Report is found in "Gehlen History," pp. 34-37. It is difficult to discern Bossard's original report to the DCI because several versions appear to have survived. In a three-page memo to the DCI on 29 May 1947, Bossard recommended that the National Intelligence Authority make the final determination whether CIG have any participation in RUSTY. This memo is generally lukewarm about the operation. In a second, but similar, memo of 29 May 1947, Bossard simply recounts RUSTY's background and its advantages and disadvantages. He does not make a recommendation. In a third and longer report (undated), Bossard recommends that CIG assume control of RUSTY. I have selected the fourth report (listed above) as the ultimate Bossard report. The three other versions are located in DO Records, Job 0001 Box 5, Folder 9, CIA ARC (S).

32. Galloway, Memorandum to DCI, "Operation RUSTY," 3 June 1947, DOTS 1171, DO Records, Job 0001 Box 13, Folder 1, CIA ARC (S). A draft of the cable from CIG to G-2 EUCOM is also included. A copy of the actual cable, Director, CIG to G-2, EUCOM, 5 June 1947, OUT 2890, is found in DO Records, Job 0001 Box 7, Folder 203, CIA ARC (TS).

33. DCI to Secretaries of State, War, Navy, and Personal Representative of the Present, "Operation RUSTY," DCI Records, Job 0001 Box 11, Folder 481, CIA ARC (S). This document contains marginalia, dated 20 June 1947, written by Brig. Gen. Edwin K. Wright, DDCI, about the decision not to send this memorandum. (S)

34. Brig. Gen. Edwin K. Wright, Memorandum for the Record, 20 June 1947, DCI Records, Job 0001 Box 13, Folder 549, CIA ARC (C). In addition to Hillenkoetter and Chamberlin, Gen. Wright and Col. Williams also attended the meeting. For another description of this meeting, see Cable, Washington to Heidelberg, 27 June 1947, OUT 3718, DO Records, Job 0001 Box 9, Folder 220, CIA ARC (TS). (S)

35. The Army and CIG discussed bringing Baun to America for several months in order to prevent him from "going independent." Samuel Bossard, Memorandum for the File, "Removal of Lt. Col. Hermann Baun to the United States," 3 September 1947, DOTS-1121, DO Records, Job 0001 Box 498, Folder 4, CIA ARC (S). The situation between Baun and Gehlen did not divide the German intelligence service within days after the general's return to Germany in 1946. Gehlen, however, retained Baun and sent him to Iran to conduct strategic planning in the Middle East. He died in Munich in December 1951 at the age of 54. (S)

36. CIG's recommendations to General Chamberlin for changes in RUSTY are found in a 27 June 1947 untitled, unclassified note written by Bossard. DO Records, Job 0001 Box 5, Folder 9, CIA ARC (C). The implementation of some of the changes are announced in Headquarters, First Military District, General Orders Number 54, "Organization of 7821st Composite Group," 1 December 1947, DO Records, Job 0001 Box 2, Folder 3, CIA ARC. (C)

37. Reese, General Reinhard Gehlen, pp. 93-97. Relations between Lieutenant Colonel Liebel and General Gehlen deteriorated quickly after Liebel's arrival; in part due to the American officer's insistence on obtaining identities of the German agents. Lieutenant Colonel Liebel also criticized Gehlen (referred by his operational name Dr. Schneider) for his poor security practices. Captain Waldman supported Gehlen's stand during this period, which created tension within the American chain of command. For this letter, see [Colonel Liebel], Memorandum to Dr. Schneider, 3 March 1948 and Gehlen's vehement reply, Dr. Schneider, Memorandum to Colonel Liebel, 11 March 1948, in DO Records, Job 0001 Box 5, Folder 9, CIA ARC (S). Liebel departed Pullach in August 1948 and
Col. Russell Philp, an old "Blue House" veteran, arrived as his successor in December 1948. Liebel's own black market activities and the poor discipline of US personnel at Pullach ultimately injured the Army's efforts to tighten control over the Germans.

The C memo is found in DO Records, Job C Box 2, Folder 6, CIA ARC (C).

57. Chief, FBI to chief of station, Karlsruhe, "Operational, 10 February 1949, MGK-W-1361, enclosing Alan R. McCracken, Acting ADSO to Maj. Gen. S. Leroy Irwin, Director of Intelligence, "Operation Rusty," 9 February 1949, in DO Records, Job C Box 5, Folder 9,
annual expense for over $5 million to support the German intelligence service. Between 1950 and 1968, CIA spent $29 million on Gehlen's organization and US liaison operations. CIA received some funding support from the Army while RUSTY, in the early days, increased its revenue through black market activities. The Agency never had full access to the identities of Gehlen agents, forcing the Agency to employ clandestine means to identify German intelligence personnel. See CSHP Vol. II, pp. XI-12 through XI-21 and XVII-1 through XVII-10. (S)

58. Shortly after CIA took over RUSTY from the Army, the Office of the US High Commission for Germany (HICOM) assumed control from the Office of the Military Government for Germany United States (OMGUS) and the Occupation Statute went into effect. In September 1949, the Federal Government of Germany formed following the ratification of the Basic Law, the new republic's constitution in May. In the spring of 1952, Germany and the Western Allies replaced the Occupation Statute with Contractual Agreements. Three years later, West Germany became a sovereign nation and joined the North Atlantic Treaty Organization (NATO). Several months later, West Germany reformed its military forces and the Gehlen Organization became Germany's official intelligence service in February 1956. (U)

60. Ibid.

61. CIA dropped the use of the term RUSTY in 1949, and used a new operational code, ODEUM, through 1950 when it changed to ZIPPER. Following the establishment of the BND in 1956, the Agency referred to Gehlen's group as UPHILL and UPSWING. Between 1957 and 1968, the Agency referred to the German service as HBLAURITE. CIA's Pullach base stopped using the Army's cover as the 7821st Composite Group and became known as Special Detachment, EUCOM, or the 7878th Signal Detachment. This later changed to Special Detachment, US Army Europe, and then to the US Army Technical Coordinating Activity. See CSHP Vol. II, p. XVII-10 and Vol. III, pp. X-20. (C)

62. See CSHP Vol. II, pp. XI-2 through XI-7. For more complete details of the conflict between CIA and Gehlen, see "Gehlen History." (S)
